# ABOUT GLASSCRAFT® DOOR COMPANY

Founded in 1977 as a small retail store in Houston, Texas, GlassCraft Door Company has focused on quality and value for over 40 years. From this small beginning, our company has grown into the premier manufacturer of decorative hardwood doors and entryways in the USA.

From our 210,000 square foot manufacturing facility in Houston, Texas, our teams of dedicated artisans, designers and master craftsmen have created a selection of the most beautiful and unique door lites available. These door lites offer choices that are not available elsewhere — including our unique operable door lites with real wrought iron grilles, and our beautiful patented “Grille-Between-the-Glass” GBG door grille options. All are available with our premium and strong fiberglass insert frames.

## PREMIUM PLUGLESS FIBERGLASS INSERT FRAMES

The Door Lite Frame is the molding that holds the glass in the door. GlassCraft's door lite frames are produced using an extruded solid WPC wood-polymer-composite material and are solid (not hollow) for super strength. These frames do not use external fasteners that require frame plugs to hide the screws, but rather incorporate a multi-patented clip system that does not require external screws or frame plugs. This unique frame system allows for the replacement of your door glass should it be damaged or broken — No need to replace the entire door as with other “plugless” frame systems. Plus they are impervious to moisture, and resist damage due to rot and mildew. Strong and secure, these frames are also tested and approved for our Impact-Rated doors and entryways. See pages 30-31 for cross-section diagrams of assembly and more information.

## WARRANTY

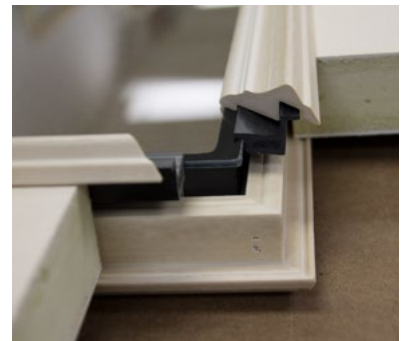

All products are covered by individual warranties: Visit [www.glasscraft.com](http://www.glasscraft.com) for complete warranty details before using, installing or finishing any GlassCraft product.

All photos, drawings, and product designs are copyright ©1982–2018 GlassCraft Door Company, Houston, Texas.

All glass, wrought iron, and grille designs shown in this catalog are protected by registered copyright with the US Library of Congress. No duplication of these images or product designs is allowed. GlassCraft, GlassCraft Door, the GlassCraft Door Company logo, and the additional terms Renaissance Lites, VitriLites, Vincilites, FerraLites, DecoGlass, Brazos, Charleston, La Salle, Marsala, Courtlandt, Salento, Palmetto, Novara, Austin, Cantania, St. Charles, Palermo and Marsais are registered trademarks. Any duplication of any part of this catalog without specific written authorization from GlassCraft Door Company is strictly prohibited. © 2018 GlassCraft Door Company.

Door moulding shown here does not use unsightly screws to mount the frame to the door.

Patented frame design creates a strong and moisture-proof barrier.

# GLASSCRAFT® RENAISSANCE LITES®

## FERRALITES® EXTERNAL WROUGHT IRON

The FerraLites® series features real hand-made wrought-iron grilles, mounted to the exterior side of the door lite. Four unique design series are each powder coated for durability with an Antique Black finish. The grilles are “operable” and use grille hinges which allow the door or sidelite wrought iron grilles to be opened to easily clean the outside glass surface. Four glass texture options are available for each iron design. Each external wrought iron grille design has been crafted by artisans and is individually crafted by hand and will vary. This variance is a feature of wrought iron and adds to the beauty and appearance of the wrought iron grille.

## VINCILITES® DECORATIVE GBG

The internal decorative “grilles-between-the-glass” GBG series have been designed to invoke the feel of traditional and contemporary decorative grilles. Each grille has been permanently sealed between two pieces of tempered safety glass to help maximize energy efficiency and helps make the decorative grilles between the glass easy to clean. Grilles are available with a light distressed Antique Black finish and each design has been crafted with subtle hand tooling marks. These variances are a feature of the grilles between the glass series. Vincilites offer perfect design option with six elegant designs and up to five insert sizes available to fit seamlessly into your entry door.

## VITRILITES® DECORATIVE GLASS

No one makes a better quality decorative glass insert panel. Our decorative glass panels are Quality Crafted™ in our workshops to assure you of excellent craftsmanship and elegant design. These VitriLites® offer beveled glass center groupings or clusters of quality, hand beveled clear glass pieces, which we combine with crystal obscure glass backgrounds and borders using a variety of glass textures. This combination affords maximum beauty and privacy. Each individual piece of beveled glass in these cluster panels is hand-cut and beveled to maximize the brilliance and sparkle of each beautiful glass design. Six different design series are available in our VitriLites®.

## DECOGLASS® WINDOWS

**Decorative Art Glass** designs are hand crafted using traditional stained glass craftsmanship. Each of these exquisite designs has been sealed between tempered safety glass, to protect and ensure the durability and beauty of real Decorative Art Glass.

The **Image Glass** series uses kiln fired technology to craft a beautiful, permanent design onto a single piece of glass. This glass is used to create an insulated tempered safety glass panel.

# FERRALITES® EXTERNAL WROUGHT IRON

GlassCraft's FerraLites External Wrought Iron Insert Series feature real hand-made wrought iron grilles and textured insulated glass panels. The wrought iron grille is "hinged" to allow the grille to open for ease of cleaning. (See detail on hinge at right.)

The iron grilles are powder-coated in an antique black color. Four iron design series are available, and each grille is available with four glass texture and obscurity options. (The degree of "obscurity" is noted for each door lite insert.) The glass panels use tempered safety glass, and this two-layer-thick safety glass panel is then mounted in our door lite frame with the wrought iron grille for installation into your door. All FerraLite designs are unique, and designed and crafted by GlassCraft.

**Operating Iron Grille Hinge**  
mounting system makes cleaning the glass easy. Grilles may be locked into place with a locking screw.

## VINCILITES® • DECORATIVE GBG

The wrought-iron inspired VinciLites series of decorative “grille-between-the-glass” or GBG door inserts are unique in their appearance, and feature simulated hand-tooling marks and new and unique designs. Available in all door lite sizes, these six design series feature a decorative grille finished in antique black, mounted between two pieces of tempered safety glass. Each decorative insert has four glass texture options available with varying obscurity levels – all of which allow daylight to enter. All VinciLite designs have been created and are unique to GlassCraft, who has multiple patents on this product and process.

The background of the entire page is a photograph of autumn foliage, featuring green leaves and some yellow and orange flowers. Overlaid on this is a decorative glass insert. The insert has a leaded glass design with a central diamond-shaped pane and several curved, arched panes. The glass panes have a textured, iridescent appearance. The entire insert is held together by a silver-colored metal frame with visible leaded glass joints.

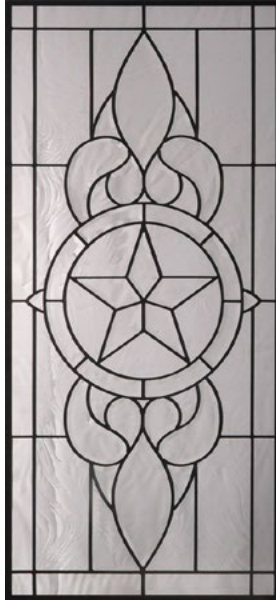

## VITRILITES® • DECORATIVE GLASS

GlassCraft's VitriLites Decorative Glass Insert Series feature hand-made leaded glass panels, each with crystal obscure glass textures and hand-cut and beveled glass highlights. This panel is mounted between two pieces of tempered safety glass creating an air and watertight sealed unit. This three-layer-thick safety glass panel is then mounted in our door lite frame for installation into your door. The VitriLite Series features six unique designs, all designed and crafted by GlassCraft...each design is shown at right. These designs feature either our "satin nickel" came color or our "antique black" came color. Not every design comes in both satin nickel and antique black came.

# PREMIUM PLUGLESS FIBERGLASS FRAMES

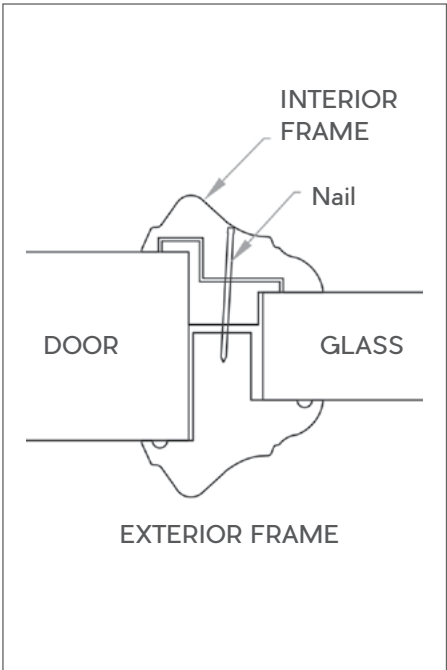

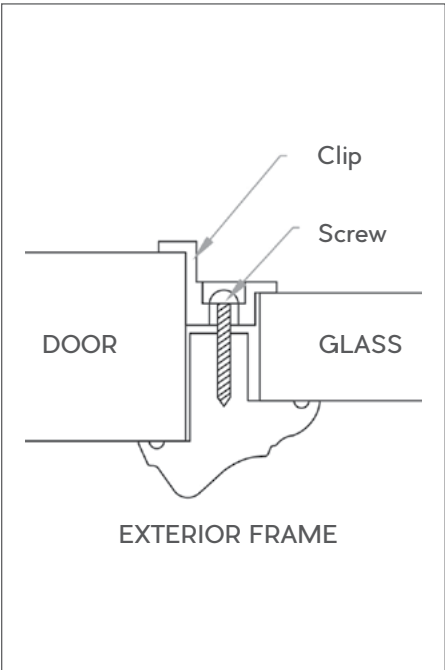

## Features & Benefits

- Made of solid composite material (not hollow) for added strength.
- Fastened without unsightly screws. The overall look is cleaner and aesthetically superior.
- The multi-patented clip system allows for replaceable glass inserts. No need to replace the entire door as with other “plugless” frame systems, saving you additional expense.
- Resistant to damage due to rot and mildew.
- Strong and secure, these frames are also tested and approved for our Windstorm and Impact-Rated doors.
- Offered with award-winning finish options to match your GlassCraft entry door.

Image Glass Series - Renaissance

# DECOGLASS® • WINDOWS

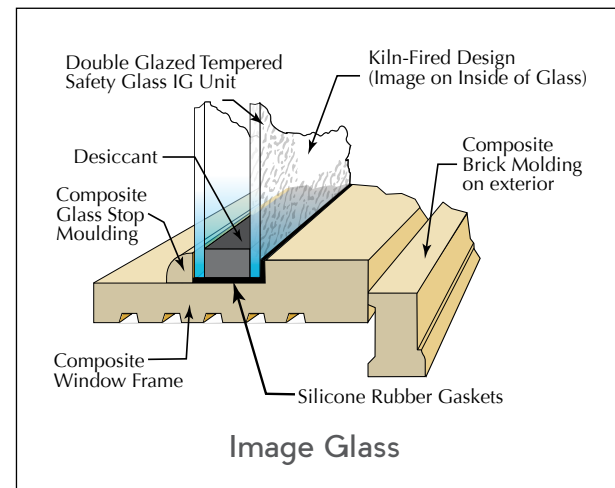

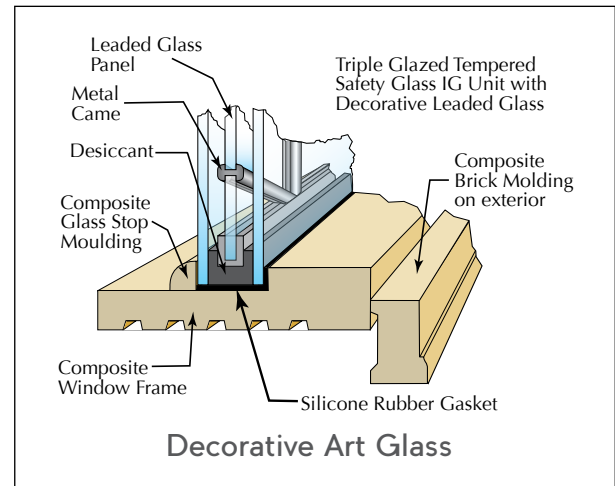

## DECORATIVE ART GLASS SERIES

Decorative Art Glass windows are crafted by hand using traditional stained glass techniques to highlight the captivating designs. Superior energy performance provides year round comfort with standard low maintenance composite material and triple glazed construction.

Enjoy all the beauty of natural light in complete privacy without window curtains or shades.

## IMAGE GLASS SERIES

The Image Glass window uses kiln fired technology to create a permanent and beautiful design onto a single piece of glass. This state of the art technique provides for textures and design elements unique to the Image Glass Series. GlassCraft's Image Glass Series is double insulated to protect against sound, heat and cold. Its low maintenance composite material and easy to clean safety glass provide year round comfort. The Image Glass series creates the perfect mixture of new and traditional to expand your decorative glass options.

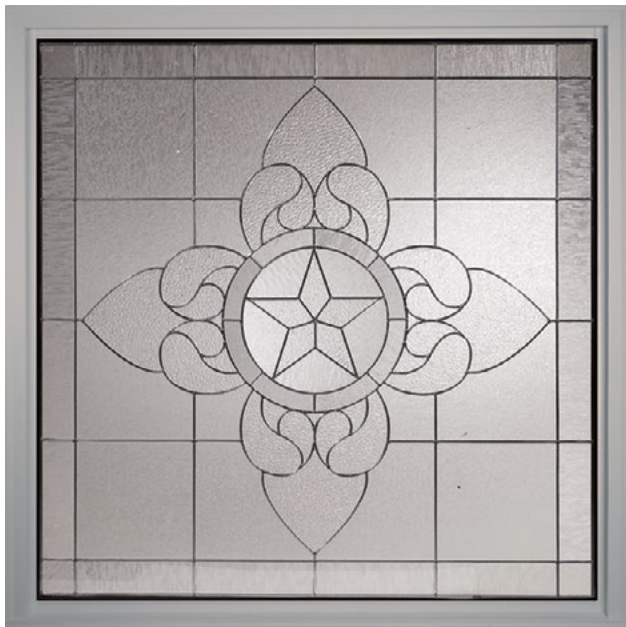

## NEW COMPOSITE CONSTRUCTION

DecoGlass Window frames are constructed using a cellular PVC composite material for superior durability. The composite material is split, crack, and rot resistant, and does not absorb moisture. The decorative multi-layering of the insulated glass unit provides high energy efficiency, and offers obscurity and privacy while still admitting light.

## CRAFTED IG INSULATED GLASS

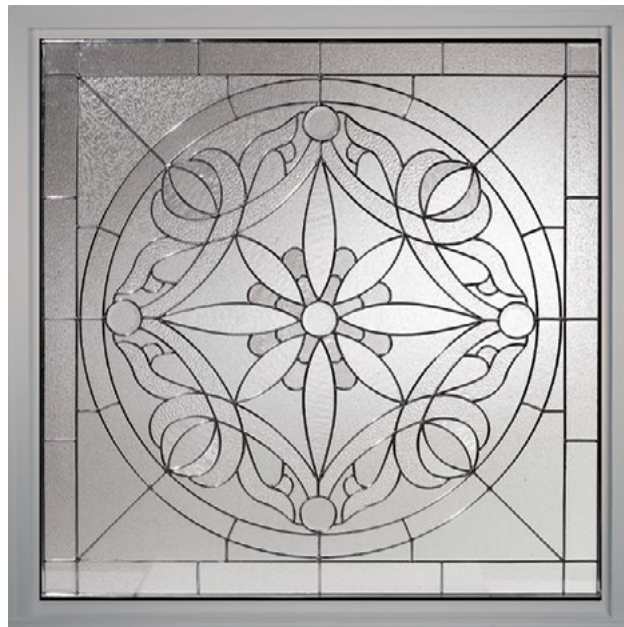

No one makes better quality decorative glass panels for their doors and windows than GlassCraft. Our Deco Glass Window Series are Quality Crafted™ in our workshops to assure you of excellent performance and elegant design. Our IG insulated glass panels provide improved security, increased energy efficiency and ease of cleaning while protecting the glass from possible breakage. The triple-thick, triple glazed IG unit in our Decorative Art Glass Series permanently seals the decorative glass panel inside of two sheets of tempered safety glass.
